**PROJECTS**

**Personal Responsive Portfolio**

Web Development

- As a beginner in HTML and CSS with a passion for creating clean, responsive designs, I have built a portfolio to demonstrate my skills in web development.
- The portfolio is built using HTML, CSS and typed.js provided by JAVASCRIPT to provide a eye catchy experience.

**Bangalore Real State Price Prediction Model**

Data Science and Machine Learning

- This project aims to build a predictive model to estimate real estate prices based on property characteristics such as location, BHK, bathroom and total square foot area. The dataset was sourced from a popular website know as www.kaggle.com consisting of over 10,000 property list form the city of Bangalore
- By using Machine Learning and Data preprocessing I extracted errors and outliers form from the dataset.
- Tools being used are Jupyter Notebook, PyCharm python editor, Postman server.
